EDUCATION

BINUS UNIVERSITY, Alam Sutera, Indonesia

2023 - Present

Computer Science, Undergraduate Student

GPA: 3.80 / 4.00

- Related Coursework: Full-stack Web Development, Software Engineering, Agile Software Development

WORK EXPERIENCE

Bank Syariah Indonesia (Internship)

Feb 2026 - Present

Development Team Intern

- Developed dashboard for monitoring projects for Consumer Risk Group to effectively track SDLC Phases.
- Successfully delivered the project within 2 months, before the 3 months deadline.

ORGANIZATIONAL EXPERIENCE

HIMTI BINUS University

Mar 2025 - Jan 2026

Web Development Division Activist

- Applied Agile (Scrum) workflows using Jira to manage tasks efficiently and enhance teamwork.
- Strengthened critical thinking, communication, and collaboration skills through technical brainstorming sessions to propose new features for the HIMTI official website.

Oikoumene Fellowship

Mar 2025 - Jan 2026

Media Communication Division Activist

- Collaborated with fellow members to design creative media that fostered community connection.
- Contributed to planning and executing fellowship events through effective communication and coordination.
- Actively contributed to fellowship activities, fostering teamwork and interpersonal growth.

PROJECT EXPERIENCE

ReadSpace (Digital Library)

- Developed a full-stack library system with Role-Based Access Control for Admin, User, and Guest roles.
- Integrated Laravel Breeze for secure user authentication and personalized "Favorite Books" functionality.
- Managed book data using MySQL and Blade templates, implementing full CRUD operations and search filtering.

EduFun (Learning Management System)

- Developed a universal LMS for cross-institutions to connect, share resources, and collaborate.
- Built core back-end features including classroom management, assignment reminders, and discussion forums.
- Integrated the Gemini API to power an AI chatbot that guides users through the platform.

Garbage Detection AI

- Developed an AI to detect garbage types using a pre-trained AI model (YoloV5).
- Improved model accuracy through dataset optimization and hyperparameter tuning.
- Created comprehensive project documentation, including training process, and training results.
